Press Release

NEW PRODUCT

# Tom DIXON.

## Gold Ball Mirror

Our instantly recognisable lamp was originally inspired by space helmet and disco balls. An extra level of sophistication is reached in new gold finish, which is created by vaporising a thin layer of pure metal onto the internal surface of a polycarbonate globe.

The vacuum deposition process results in a highly reflective gold mirrored surface, which takes on the characteristics of its surroundings.

It can be used alone or in multiples to create dramatic features. Available in pendants: Gold Mirror Ball 50cm, Gold Mirror Ball 40cm and Gold Mini Mirror Ball 25cm.
