

DEEBOT 710

DEEBOT 710 uses Smart Navi™ 2.0 technology with visual mapping to follow a more efficient systematic cleaning path - every inch counts.

Sees more, cleans better.

Smart Navi™ 2.0 Technology

Smart Navi™ 2.0 technology consists of on-board sensors and an visual lens to precisely navigate your home. DEEBOT 710 maps your home to prevent cleaning the same area multiple times, resulting in better and faster cleaning.

Easy-To-Use

You can start, stop, or charge your DEEBOT with Amazon Alexa, Google Assistant, a simple remote control, or via smart phone with our ECOVACS Home app. Schedule your cleanings from anywhere to always return to a clean home.

Multiple Cleaning Modes

DEEBOT can clean an entire floor (Auto mode), tackle a messy spot (Spot mode), or clean just the edges of your floor (Edge mode). DEEBOT's Max Mode will double the suction power for a deeper clean on carpets.

DEEBOT 710 is equipped with Smart Navi™ 2.0 technology to visually map your home to clean in a systematic pattern that covers every inch. With multiple cleaning modes, Amazon Alexa and Google Assistant compatibility, a simple remote, and ECOVACS Home app connectivity, DEEBOT is ready to tackle any mess.

Key Features / Benefits

Smart Navi™ 2.0 Technology enables DEEBOT 710 to visually map your entire home while vacuuming.

When the battery is running low, DEEBOT will automatically return to its docking station to **Automatically Charge**.

Max Mode doubles the suction power to easily take care of difficult areas on both hard floors and carpets.

Anti-Collision & Stair Safety Sensors ensure a safe clean preventing DEEBOT from slamming into objects and falling off ledges.

Start, stop, and charge your DEEBOT with your **Amazon Alexa, Google Assistant, or ECOVACS HOME app**.

3-Stage Cleaning is powered by two side brushes, a main roller brush, and a powerful suction motor to sweep, lift, and vacuum dirt off your floor.
