

10 YEAR MANUFACTURER'S LIMITED WARRANTY

All parts of this Elements Of Design faucet are warranted to the original retail purchaser to be free from defects in material and workmanship for a period of ten(10) years from the date of purchase as shown on the purchaser's receipt. This warranty is limited to defective parts only, labor charges and/or damage resulting from improper installation, repair or replacements, as well as incidental and consequential damages connected therewith are excluded.

Any damage to this faucet as a result of misuse, abuse, neglect, accident for improper installation or any use not consistent with the instructions furnished by Elements of Design, will void this warranty. Replacement parts can be obtained from your local dealer.

CAUTION!!!

1. Water lines must be completely flushed before use, to avoid bris & clogs in your water system leading to mal-function and reduction of water flow.
2. Warranty to be void if water lines are not flushed before use of new faucet.
3. Use of abrasives of any strength may damage the finish of your faucet and void this warranty.

CODE APPROVAL: LA#M-000018

INSTALLATION SHEET

In situations where the hot and cold water inlet supplies are not in the standard positions, a reversible type cartridge can be used. A reversible cartridge will allow you to modify the direction of the water supply to the correct orientation without changing the pipe locations. It is easy to change the installation by yourself by using the following instruction.

NOTE : FLUSH ALL PIPING THOROUGHLY BEFORE INSTALLATION .

Teflon tape or pipe joint compound on all threaded connections are required .
SHUT OFF THE WATER SUPPLY VALVES BEFORE INSTALLATION .

Tools required for installation of this product are :

- ◇ Screw Driver
- ◇ Tubing Cutter
- ◇ Teflon Tape
- ◇ Adjustable Wrench
- ◇ Channel-lock Pliers
- ◇ Measuring Tape

Figure 1 :

Figure 1A :

Step 1 :

Install piping and fittings with valve body as shown in Figure 1.

IMPORTANT : Valve rough-in is $1 \frac{45}{64}$ " $\pm \frac{1}{2}$ " from CENTERLINE OF SUPPLIES TO FACE OF FINISH WALL.

Facing front of valve body connect hot water to left side and cold water to right side .

The valve has "up" and "down" cast into the back of body .Position "up" to the shower and "down" to the tub .

Install so that line indicated on plastic plate on valve is flush with finished wall as shown in Figure 1A .
