## at High Speed

|                                                      |                                                              |                                                                      |
|------------------------------------------------------|--------------------------------------------------------------|----------------------------------------------------------------------|
| Airflow<br><b>3516.0</b><br>Cubic Feet Per<br>Minute | Electricity Use<br><b>67.8</b><br>Watts<br>(excludes lights) | Airflow Efficiency<br><b>52.0</b><br>Cubic Ft Per<br>Minute Per Watt |
|------------------------------------------------------|--------------------------------------------------------------|----------------------------------------------------------------------|

Compare: 49" to 60" ceiling fans have airflow efficiencies ranging from approximately 51 to 176 cubic feet per minute per watt at high speed.

**Money-Saving Tip:** Turn off fan when leaving room.
