INSTALLATION OF MIRROR

Mounting point measurement

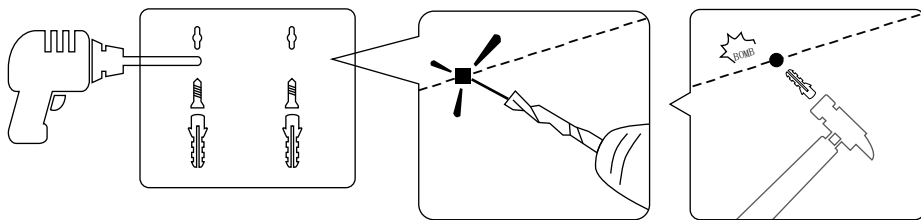

Measure the distance of four hooks centre and use the level ruler to draw a horizontal line on the wall and then mark the location of the center of hooks.

The holes # 1 2 are used when installing the mirror horizontally.

The holes # 3 4 are used when installing the mirror vertically.

It is recommended to use only two hooks.

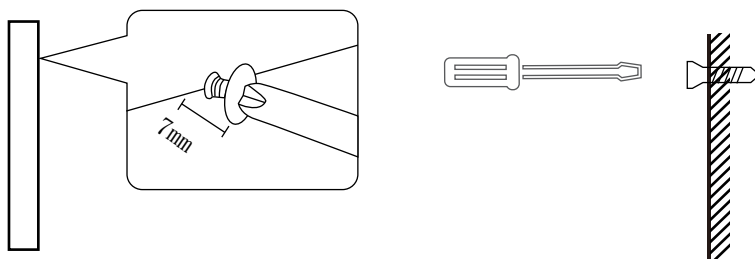

Drill pilot holes on the marked spots

Use an electric drill to punch two 6mm holes at the marked spots, and then apply wall anchors with hammer.

(6mm drill bit, drilling depth in 5 cm)

Insert the screw

Use the screwdriver to loosen the screw on the wall anchors, set aside 7mm distance to wall.

Mount the mirror on the wall and ensure it is straight
