

Heavy Gauge Links

For strength, durability & safety

Easy Open and Close

Occupant's weight opens recliner, activator only unlocks mechanism. Slight foot pressure closes footrest.

Direct Drive with Double Over Center Locks

Maximum synchronization of both sides

Heavy Flanges on Pivot Points

Maximum strength , stability & side-to-side movement

Weight Capacity

Rocker Mechanism rated for 300 lbs

Layflat/Wall Hugger rated for 300 lbs

Durability Tested for 25,000 Cycles

Lasting product performance

Geometry Used for Balance

Consistent & easy operation uses occupant's weight for balance.

Stronger Link Supports

No pinch points means greater bending resistance, improving weight capacities and durability.

Large Diameter Tubes

Maximum strength , stability, side-to-side movement, and torque control

Delrin Rivet Bushings

Reduces wear and increases durability. No steel—to –steel contact

Wider Base Mounting Points

Greater strength and stability

Nylon Stop Pin Bushings

Reduces noise, no metal—to– metal noise when links contact stop pins

High Strength Low Alloy Steel Frame
