

## **ENERGY INFORMATION**

### **at High Speed**

<div>Air Flow</div> <div><b>7567</b></div> <div>Cubic Feet Per Minute</div>	<div>Electricity Use</div> <div><b>70.69</b></div> <div>Watts (excludes lights)</div>	<div>Airflow Efficiency</div> <div><b>107.04</b></div> <div>Cubic Feet Per Minute Per Watt</div>
---	---	--

**Compare: 49" to 60" ceiling fans have airflow efficiencies ranging from approximately 51 to 176 cubic feet per minute per watt at high speed.**

**Money Saving Tip: Turn off fan when leaving room**
