

## Mailbox Maintenance Instructions

**\*Warning\*** Cleaning products that contain Ammonia should not be used. Also do not use anything abrasive to wipe or clean the metal surface.

**\*Warning\*** When cleaning the front panel be careful not to get caught in the metal artwork or patterns. You may bend or break the delicate artwork.

Regular cleaning of your America's Finest Lighting products will help keep the finish from tarnishing and keep them looking good for years to come. Inspect your mailbox once a month depending on the dirt level either remove with air or lightly dust with soft cloth. If needed use water with mild detergent (Dish Soap) and lightly scrub with soft cotton cloth. Be careful when cleaning around the front panel of your mailbox. The delicate patterns and artwork can get caught in your cleaning cloth which can bend or break, rinse and gently dry mailbox. For coastal locations you may want to check your mailbox twice a month to help prevent the harsh salt air from damaging your finish.
