

ENDON®

Kellaway Pendant Light Fitting INSTRUCTION MANUAL

Safety Warnings

- These products are only suitable for connection to a 240V~50Hz supply in accordance with current IEE wiring Regulations and should be installed in accordance with local Building Regulations and are for Domestic ceiling use only. They are not suitable for a Bathroom location.
- Before installing your light fitting always switch off the mains supply and remove the appropriate fuse or switch off the appropriate circuit breaker before commencing installation.
- If the Class II, Double Insulated symbol  is on the Light Fitting then the Fitting does not require an Earth, and Live or Neutral **must not** be connected to Earth. If there is no such symbol the Fitting **must** be Earthed. The terminal blocks are supplied according to requirements of the fitting.
- Never fit bulbs of a higher wattage than those specified on the label (as these may cause overheating and damage the fitting).
- If you are in any doubt about your competence please consult a qualified electrician.
- These products may contain delicate parts – be careful during handling and maintenance to avoid breakage.
- If any modification is made it will invalidate the warranty and may render the product unsafe.

Care Information

Allow 10 minutes to cool before replacing, adjusting or cleaning.
Clean with a dry cloth only. Do not use liquid or abrasive cleaners on this product.

Assembly/ User Instructions

Before you start

Please read these instructions carefully before fitting and retain for reference. Check the packaging and make sure that you have all the required parts. Follow each assembly step in order to prevent incorrect assembly. Ensure that the product is fully assembled as illustrated before use.

The Light pack contains:

Light fitting.
Terminal connection block(s).
Fixing pack.

The following tools may be required:

Selection of cross and flat head screwdrivers.
Allen keys
Electric drill and assorted drill bits.
Wire strippers.
Electrical insulation tape.

These assembly diagrams are intended as a guide – if in doubt consult a qualified electrician.

1. Decide on the position of the light fitting / or remove existing light fitting. Take a note of the position of the electrical connections. Ensure there is a solid mounting surface, preferably a wooden joist or joist bridge to support the weight of the light fitting.
2. Use the fixing bracket as a template to mark the screw holes. Mark the screw holes and secure to the ceiling with appropriate screw fixings (Dg.1).
3. Support your fitting and connect the house wiring to the terminal block (Dg.2-1) – see expanded wiring details below. **NOTE: This is a Class II fitting and must not be earthed.** Any loose terminal blocks – not secured to ceiling cup – should always be covered with 2 layers of good quality insulation tape.
4. Secure the ceiling cup over the bracket by using the screws (Dg.2-2).
5. Loosen the lampholder screw (Dg.3-1)

Assembly/ User Instructions Continued

6. Fit the bulb(s) (Dg.4-2), being careful not to touch it with your bare hands - use a cloth or gloves. **NOTE: Never fit bulbs of a higher wattage than those specified on the label (as these may cause overheating and damage the fitting).**
7. Fit the shades (Dg.4-3), by slotting them over the lampholders and securing in place with the hand-screw (Dg.4-4)
8. Turn on the power and test.
